MSD of Warren Township Core Values

- **Every child can learn and succeed**—Every employee, both certified and classified, makes a contribution to the success of every student. All employees should take their role seriously in building positive relationships with students.
- **Ethics**—Fair treatment, honesty, openness, integrity, and respect enable us to make the proper decisions.
- **Decisions in the best interest of children**—We must always ask, “What is in the best interest of the children?”, not the needs of the adults who serve the students.
- **Best practices**—We believe in the value of investing in our staff through professional development to ensure our students receive instruction based on best practices and current research.
- **Responsible stewards of tax dollars**—We must always work toward efficiency through wise use of tax dollars.
- **Use of data in the pursuit of excellence**—Our consistent and systematic use of data to drive our decisions, particularly as it relates to student achievement, is essential to increase the flexibility of our learning structures to respond to student needs. Data helps us make objective decisions based on the evidence at hand.
- **Service to our community**—We connect with our stakeholders through partnerships and provide service to our community to repay their investment in our schools.

PreK-6 Program & Intermediate Program

Warren offers a comprehensive curriculum and instructional program for students in pre-school through grade 6. All of our elementary schools offer full-day everyday kindergarten. Art, music, and physical education are included at each school. All buildings are air-conditioned and equipped with classroom computers as well as a computer lab. Media Centers provide opportunities for students to explore technology through SmartBoard, Smart Response, and production studios. The academic program focuses on state and national standards and student achievement.

Middle School Program

Warren Township meets the needs of middle school students at grades six, seven, and eight. The middle schools are organized around those practices that best meet the unique needs of the middle school child and characteristics of the early adolescent. Middle school students have a wonderful opportunity to build all the skills they need for high quality success in grades 9-12.

Freshman Academy

The Freshman Academy opened in the Fall of 2003. Students have the opportunity to establish a strong foundation for four years of excellence for all Warren Central and Walker Career Center students.

High School Program

Warren Central High School students have the opportunity to choose from 650 different course offerings to meet their individual needs. Using a variety of best practices during daily instruction, teachers set high standards for students by engaging them in applying the ideas and skills that are key to success on State and National assessment.

Walker Career Center

The Walker Career Center's goal is that all students will graduate prepared for J.A.M.S. (Job, Apprenticeship, Military, School) All of the programs at the Walker Career Center promote students to continue to pursue life-long learning in their post-secondary plans. At this time, the career center offers over 40 courses where students may earn college credit at little or no cost.

Special Programs:

- ⇒ Early Childhood Center
- ⇒ Excel (High Ability)
- ⇒ Alternative Education
- ⇒ ENL (English as a New Language)
- ⇒ Special Education
- ⇒ Adult and Community Education
